To whom it may concern at the FCC. I strongly oppose HR 4026, The bill that is trying to take choice away from the consumer in the world of radio. In this free market society, it is unthinkable that the "established " media such as AM or FM radio can manipulate the United States government to do away with their competition so they can have a monopoly on the air waves. I live in a rural area, and the selection is not quite what it may be in Washington D.C., so you may not understand how important XM radio is to those of us in "fly-over country". Just as with other types of business, let the cream rise to the top, and keep the government out of it. If AM or FM radio doesn't feel their product can stand the competition, they can find ways to better their product. Sink or swim, just as XM has had to do these last few, and I may add, lean at times, years.

Sincerely, Rod Lammer 701-320-4340
